SUMMARY DESCRIPTION OF BUSINESS

What is our business?

The Company is in the business of the design, development, production and commercialization of micro combined heat and power and generator systems based on alkaline fuel cell technology for residential, industrial and commercial markets worldwide, in addition to the development, ownership and operations of conventional combined heat and power systems for multi-residential, industrial and commercial markets in Canada.

The Company operates through two global entities: Fuel Cell Power NV, a wholly owned subsidiary in Belgium and PWWR Flow Streams ("**PWWR Flow**"), an AFCP brand in Canada.

- Fuel Cell Power NV is focused on the development, production and commercialization of micro-combined heat and power ("**micro-CHP**") systems and off-grid and back-up power generators based on advanced alkaline fuel cell technology that generates zero CO₂ emissions. Fuel Cell Power NV is working through milestones to deliver a commercialized alkaline fuel cell in 2024.
- PWWR Flow is focused on the development, ownership and operations of combined heat and power ("**CHP**") assets. PWWR Flow assets deliver efficiency improvements of over 20% with reduced costs to customers in multi-residential and commercial applications. PWWR Flow has contracted existing CHP assets in Toronto, Canada, and has an additional pipeline of potential contracts valued at over \$50 million currently in development.

The Company's wholly owned subsidiary in the Czech Republic, Fuel Cell Power s.r.o role is to assist in the development of the prototypes, deliver catalyst material for the electrodes and facilitate research and development contracts with external partners.

Recent developments

The Convertible Notes allow the Company to access up to C\$4,000,000 on an aggregate basis and can be drawn on at the request of the Company. Material facts

There are no material facts about the securities being distributed that have not been disclosed in this offering document or in any other document filed by the Company in the 12 months preceding the date of this offering document.

What are the business objectives that we expect to accomplish using the available funds?

The Company intends to use the aggregate gross proceeds from the Offering for acquisition capital, development capital for PWWR Flow CHP projects and manufacturing capital for its wholly owned subsidiary Fuel Cell Power NV, as well as for general administrative and working capital expenses. The following table sets out the business objectives the Company expects to accomplish using its available funds following the Offering, and lists the milestone event(s) for each business objective, anticipated time period for completion and estimated cost:

Business Objectives	Preceding Significant Event (each, an "Event")	Period in which event is expected to Occur	Costs Related to Event
Enhancing general administrative and working capital expenses	N/A	Q1-2 2023	Up to \$800,000 relating to investor relations efforts and expenses

Bolstering acquisition capital as deposit and possibly cash of future power related acquisitions with cash and/or equity securities	N/A	Q1 2023 - onward	\$0 - \$100,000

The working capital of the Company as of December 31, 2021 was \$6,112,617 and the working capital as of November 30, 2022 was \$(183,960). The decline in working capital related to the development of the Company's fuel cell prototypes in Europe, the acquisition of operating CHP projects and assets. The Company has limited revenue at this time, which results in the need to use working capital towards funding current operations.
